DECONTAMINATION/STAGING SITE ASSESSMENT

Facility Name :	Cocodrie	Facility Location ID:	CocW01
Assessment Date :	9/5/2010	Incident Name :	BP Spill
Physical Location :	Cocodrie Marina 106 Pier 56		
City, State :	Chauvin, LA	County :	Terrebone

ASSESSMENT INFORMATION

General Site Information and Observations	
1. All waste stored in lined rolloff boxes?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> N/A
2. Rolloff boxes covered after filled (or end of day)?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> N/A
3. Any evidence of oily waste or oily waste waters?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A
4. If yes, was it adequately addressed?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> N/A
5. How many samples were collected?	2

Additional Comments :

WASR arrived at 0945 hours and met with BP waste disposal contractors from Heritage Environmental (David Bowers and Ken Phillips), a representative from Environmental Standards (Tim Cory), and a representative from AECOM (Zoe Knesl). Heritage indicated that there were 12 rollofs onsite: Three on hold from previous analysis, seven were empty, and two contained some bags of PPE, sand and oiled boom and used PPE. Heritage indicated that there are 3 frac tanks on site: two containing BP (decon) wastes onsite and one was empty. During the inspection, all rollofs were covered, except during active loading. Frac tanks were located within secondary containments and grounded.

WASR collected one liquid waste sample (CocW01-100907-WL-001-1) from frac tank 259907 at 1030 hours. The frac tank was approximately ¾ full of decon liquid with no oil film observed floating over the remaining volume of in the water column sampled. WASR collected samples using a Sludge Judge, with VOC-TCLP samples being collected as grabs, and SVOC-TCLP, RCRA Metals-TCLP, and Ignitability being collected as composites. Samples were wiped down, bagged and placed on ice. Split samples were provided to BP's environmental contractor. PPE and wastes were bagged and disposed of in a rolloff.

At 1115 hours, WASR collected one bag of soiled boom, one bag of sand, and one bag of used PPE from rolloff. Sample CocW01-100907-WS-001-1 was collected at 1130 hours, with VOC-TCLP samples being collected as grabs, and SVOC-TCLP, RCRA Metals-TCLP, and Paint Filter being collected as composites. Samples were wiped down, bagged and placed on ice. Split samples were provided to BP's environmental contractor. PPE and wastes were bagged and disposed of in a rolloff.

Other observations noted during the site visit. 1) All oily solid waste and liquid waste are delivered to Colonial Landfill for disposal. 2) One pallet of universal waste was noted that contained four 55-gallon drums with labels stating two drums with gasoline contaminated waste, one drum with used oil and one drum with used batteries/acid. All universal waste is sent to Heritage Waste Hazardous Waste collection facility in Indianapolis, IN.
